Journal of the Indian Chemical Society

Vol. 78, 2001

Subject Index

Acetophenones

Kinetics of bromination of substituted acetophenones by phenyltrimethyl ammonium tribromide, 310

Acrylamide

Polymerization of acrylamide in the layered space of montmorillonite, 468

Acetylbenzimidazolethiosemicarbazone

Synthesis and antimicrobial properties of zinc-, cadmium- and mercury(II) complexes of sulfur donor ligands, 32

Acrylonitrile

Kinetic studies on the polymerization of acrylonitrile initiated by *p*-nitrophenacyl dimethyl sulfonium ylide, 547

Acetylporphyrins

Oxidative rearrangement of acetylporphyrins, 761

Adenine

Synthesis and spectroscopic characterization of cobalt(III) based supramolecular complexes bearing thymine and adenine, 643

Adiantum lunulactum

Triterpene from *Adiantum lunulactum,* 267

Adsorption

Organic fluids near a hard wall : statistical mechanical approach, 15

Separation of oxygen and nitrogen from air by molecular sieve adsorbents, 551

Adsorption of cationic dyes ethidium bromide and methylene blue individually as well as from their binary mixture on silica, 611

Kinetics of adsorption of DNA at solid-liquid interfaces, 689

Adsorption-desorption

Phosphate adsorption-desorption kinetics in some acidic soils, 86

Air

Separation of oxygen and nitrogen from air by molecular sieve adsorbents, 551

Alcohols

Calculation of molecular polarizability and water solubility of alkanes and alcohols, 192

Density and viscosity studies of binary mixtures of aniline with pentan-1-ol, hexan-1-ol, heptan-1-ol, octan-1-ol, and decan-1-ol at 298.15, 303.15, 308.15 and 313.15 K, 368

Algae

Bioactive polysaccharides from marine brown algae (phaeophyceae), 431

Alkanes

Calculation of molecular polarizability and water solubility of alkanes and alcohols, 192

Alkoxides

Ecstasy of learning, teaching and research experience in a university environment, 697

Alkoxyethanols

Volumetric properties of some *n*-alkoxyethanols with alkyl acetates at the temperature 298.15 K, 18

Alkyl acetates

Volumetric properties of some *n*-alkoxyethanols with alkyl acetates at the temperature 298.15 K, 18

Alkylene dithiophosphate

Synthesis and reactivity of triphenyltin(IV) compounds containing Sn-S bonds, 254

Allyl bromide

Ytterbium metal promoted reaction of diselenides with allyl bromide, 313

Allyl coumarinyl ethers

Mitsunobu coupling of 7-hydroxycoumarins with allylic and propargylic alcohols : A facile direct access to tertiary allyl coumarinyl ethers, 380

Allylic alcohols

Mitsunobu coupling of 7-hydroxycoumarins with allylic and propargylic alcohols : A facile direct access to tertiary allyl coumarinyl ethers, 380

Allylic sulfides

A novel method for the synthesis of allylic sulfides from disulfides and allylytterbium bromide, 263

Aluminium

Study on some metal(III) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

Amines

Study on preparation of asphalt antistrip additives from amines and aldehydes, 427

Amino acids

A modified spray reagent for the identification of amino acids on thin layer chromatography plates, 49

Effect of mobile phase composition and pH on thin layer chromatographic behavior of amino acids, 419

Aminoethylisothiouronium bromide hydrobromide

Mechanism of radioprotection by β-aminoethyl isothiouronium bromide hydrobromide, 337

Aminohydroxypyridine

Synthesis of some salts of 2,3-dihydroxypyridine and 2-amino-3-hydroxypyridine chelates of bis(cyclopentadienyl)titanium(IV), 202

Aminophenylphenylbutadiene

A fluorescence study of 1-*p*-aminophenyl-4-phenylbuta-1*E*, 3*E*-diene in organic solvents, 1,4-dioxane-water binary mixtures and micelles, 635

Aminothiazoles

Synthesis and biological activity of Schiff bases of aminothiazoles, 474

Anhydrides

Reactions of aniline with unsymmetrical acid anhydrides, 265

Anilides

Reactions of aniline with unsymmetrical acid anhydrides, 265

Aniline

Density and viscosity studies of binary mixtures of aniline with pentan-1-ol, hexan-1-ol, heptan-1-ol, octan-1-ol, and decan-1-ol at 298.15, 303.15 and 313.15 K, 368

Antipyrinethiosemicarbazone

Synthesis of some lanthanide(III) complexes derived from 4-[*N*-(4-methoxybenzylidene)amino]antipyrinethiosemicarbazone, 39

Aquachromium

Kinetics and mechanism of the reaction of aquachromium(III) with pyridine-3-carboxylic and pyridine-2,6-dicarboxylic acid : A comparative study, 123

Aristolochic acid

Quantitation of aristolochic acid using high performance liquid chromatography with photodiode array detection, 487

Aromatic acids

The reactions of phenols with α,β-unsaturated aromatic acids in presence of polyphosphoric acid : synthetic and mechanistic studies, 743

Aromatic hydrocarbons

Density and viscosity of binary mixtures of methyl ethanoate with aromatic hydrocarbons at 298.15 K vis-a-vis molecular interactions, 133

Arteether

Simultaneous determination of antimalarial artemisinin, dihydroartemisinin and arteether using reversed phase high performance liquid chromatography, 489

Artemisinin

Simultaneous determination of antimalarial artemisinin, dihydroartemisinin and arteether using reversed phase high performance liquid chromatography, 489

Arylazopyrazoles

Convolutive voltammetric studies on some *N*-benzylsulfonyl-3,5-dimethyl-4-arylazopyrazole and some of its derivatives at a mercury cathode, 127

Arylpyrrolylsulfones

Quantitative structure activity relationship (QSAR) studies on anti-HIV-1 and cytotoxic arylpyrrolylsulfones, 154

Asphalt antistrip

Study on preparation of asphalt antistrip additives from amines and aldehydes, 427

Azodyes

Polymetallic complexes. Part-LXXV. Cobalt-, nickel-, copper-, zinc-, cadmium- and mercury(II) with bis-bidentate azodye ligands, 395

Azomethine

Synthesis of aryl substituted azomethine complexes of iron-, cobalt- and copper(II), 28

Azure dyes

Photoelectrochemistry of azure dyes in phospholipid liposome, 607

Benzenesulfonamides

Kinetics and mechanism of oxidation of iron(II) by *N*-chloro-*p*-substituted-benzenesulfonamides, 412

Benzoflavanone

Synthesis of 6-hydroxy-3-naphthylidene-5′,6′- benzoflavanone, 319

Benzothiazinones

Synthesis of some *N*-substituted-1,4-benzohiazinones, 150

Benzothiazoles

Samarium diiodide promoted reductive cyclization of nitrodisulfides with nitriles : A new route to benzothiazoles, 316

Benzothienobenzothiophenes

Pi electronic structure and spectra of benzothienobenzothiophenes, 206

Benzyl alcohol

X-Ray, electrical, infrared and catalytic studies of the system $Zn_xCu_{1-x}Ga_2O_4$, 115

Benzylideneaminopyridine

Voltammetric reduction behavior of *N*-(benzylidene)-2-aminopyridine, 290

Bioactivities

Bioactive polysaccharides from marine brown algae (phaeophyceae), 431

Bioceramic

Synthesis, sintering and microstructure of beta-tricalcium phosphate for prosthetic applications, 386

Biological activity

Chelation and antibiotic activity, 273

Bipyridine

Three-dimensional hydrogen-bonded supramolecular networks assembled by lanthanide picrates and 4, 4′-bipyridine, 438

Bis(mercaptoacetamido)dimethoxybenzidene

Synthetic, structural and electrical studies of some polychelates derived from bis(mercaptoacetamido)-3,3′-dimethoxybenzidene, 34

Bismuth

Study on some metal(III) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

Bismuth tungstate

Bismuth tungstate inorganic ion exchanger – an absorbent for thin layer chromatography of organic acids, 374

Book Review, 497

Boric acid

Borate complexes in solution. Part-II. Complex formation equilibria of some *cis*-diaqua-Co^{III} complexes with boric acid, 78

Brazilin

Isolation of the natural dye from the heartwood of *Caesalpinia sappan* and its use as a new neutralization indicator, 476

Bromamine-T

Kinetics and mechanism of oxidation of hexoses by bromamine-T in alkaline medium, 241

Bromination

Kinetics of bromination of substituted acetophenones by phenyltrimethylammonium bromide, 310

Butylphenol

A kinetic study of reaction of 2-sec-butylphenol with formaldehyde using different alkali catalysts, 82

Cadmium

Synthesis and antimicrobial properties of zinc-, cadmium- and mercury(II) complexes of sulfur donor ligands, 32

Property of cadmium and zinc complex with *meso*-tetra-(3,5-dibromo-4-hydroxyphenyl)porphyrin and simultaneous determination of cadmium and zinc by spectral correction method, 246

Extraction-spectrophotometric determination of cadmium in micro quantities with diphenylcarbazone, 323

Spectrophotometric determination of cadmium(II) using novel oxime-hydrazones in biological materials, 340

Caesalpinia sappan

Isolation of the natural dye from the heartwood of *Caesalpinia sappan* and its use as a new neutralization indicator, 476

Capric acid

Extraction chromatographic method of indium(III) with *n*-capric acid, 208

Carbazoles

Synthesis of 2-aryl-3-(N^9-carbazolylacetamidyl)-4-oxothiazolidines and their 5-arylidenes as antifungal and analgesic agents, 320

Carbon dioxide

Kinetics and mechanism of CO_2 methanation on a nickel catalyst, 343

Carbonyls

Reactions of 4-hydroxycoumarin with some α,β-unsaturated carbonyls and 1,3-dicarbonyls : trapping of 4-hydroxy-coumarin tautomers; formation of pimelic acid derivative and a novel bicyclo compound, 765

Catalysis

Kinetics and mechanism of CO_2 methanation on a nickel catalyst, 343

Kinetics and mechanism of reverse water-gas shift reaction on a Cu-ZnO-Al_2O_3 catalyst, 352

Cavernulin

Secondary metabolites from the cnidarian *Cavernularia* sp. : structures of the new briaranes cavernulin A and B, 619

Cement

Effect of sodium carbonate on some properties of magnesia cement, 389

Cephalosporins

Polarographic studies on simple and mixed ligand systems involving cephalosporins, 455

Cesium exchange

Study on selective sorption of ^{137}Cs on Al-substituted calcium silicate hydroxy hydrate, 392

Chalcones

Domino products from the reaction of 1,3-diaryl-2-propen-1-ones (chalcones) with cyclopentanone, 787

Chelation

Chelation and antibiotic activity, 273

Chlorosulfonated polyethylene

Study of interactions between a novel elastomer and solvents, 757

Chromatography

A modified spray reagent for the identification of amino acids on thin layer chromatography plates, 49

Extraction chromatographic method of indium(III) with *n*-capric acid, 208

Retention behavior of metal ions on plain and tri-*n*-butylamine impregnated titanium(IV) tungstate layers, 301

Effect of mobile phase composition and pH on thin layer chromatographic behavior of amino acids, 419

Quantitation of aristolochic acid using high performance liquid chromatography with photodiode array detection, 487

Simultaneous determination of antimalarial artemisinin, dihydroartemisinin and arteether using reversed phase high performance liquid chromatography, 489

Thin layer chromatography separation of anions by naturally occurring mixed oxides impregnated plates, 492

Chromium

A chromium(III) complex of a long-chair Schiff base ligand, 1

Study on some metal(III) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

Cnidarian *Cavernularia*

Secondary metabolites from the cnidarian *Cavernularia* sp. : structures of the new briaranes cavernulin A and B, 619

Cobalt

Mixed ligand complexes of iron-, cobalt- and nickel(II) with 2,3-dihydroxypyridine and some nitrogen donors, 26

Synthesis of aryl substituted azomethine complexes of iron-, cobalt- and copper(II), 28

Speciation of L-ornithine complexes of cobalt-, copper- and zinc(II) in water-dimethylformamide mixtures, 280

Conductance and ion association studies of diammine-bis-1-amidino-*o*-methylureacobalt(III) monochloride in methanol + water mixtures at different temperatures, 294

Study on some metal(III) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

Synthesis and spectroscopic identification of cobalt(III) complexes with 5-methyl-3-formylpyrazole-*N*(4)-dipropylthiosemicarbazone ($HMPzNPr_2$) : X- ray crystal structure of $[Co(MPzNPr_2)_2]NO_3.H_2O$, 601

Synthesis and spectroscopic characterization of cobalt(III) based supramolecular complexes bearing thymine and adenine, 643

Complex stability

Mixed ligand complexes : stabilities and reactivities, 707

Conductance

Conductance and ion association studies of diammine-bis-1-amidino-*o*-methylureacobalt(III) monochloride in methanol + water mixtures at different temperatures, 294

Copper

Synthesis, magnetic and spectral properties of binuclear imidazolate bridged copper(II)-copper(II) and copper(II)-zinc(II) complexes, 6

Synthesis of aryl substituted azomethine complexes of iron-, cobalt- and copper(II), 28

Borate complexes in solution. Part-II. Complex formation equilibria of some *cis*-diaqua-Co^{III} complexes with boric acid, 78

Preconcentration and separation by imidazolylazo resin for copper and zinc determination in biological samples by AAS after microwave assisted treatment, 89

Synthetic macrocycles – highly selective extraction for copper(II) ions, 152

Speciation of L-ornithine complexes of cobalt-, copper- and zinc(II) in water-dimethylformamide mixtures, 280

Non-equilibrium growth patterns and kinetic studies during electrodeposition of metals from $CuSO_4$-$ZnSO_4$ solutions, 460

Facilitated transport of copper(II) across chloroform liquid membrane using different carriers, 495

Metal complexes of some peptide derivatives. Part-XV. Mixed ligand complex formation of copper(II) with some *N*-benzenesulfonyldipeptides as primary ligands and acetate, 2-methylbenzimidazole, glycinate and bipyridine as secondary ligands, 565

Coumarins

Synthesis, X-ray diffraction study and biological activity of 8-(4-methyl-2-azothiazolyl)-7-hydroxy-4-methylcoumarin, 417

Chemistry of 4-hydroxycoumarin, 579

Cyanopyridylthiouracil

Synthesis and spectroscopic characterization of cobalt(III) based supramolecular complexes bearing thymine and adenine, 643

Cyclodextrins

Host-guest complexes : spectroscopic and thermodynamic studies of cyclodextrins-dyes, 533

Cyclopentanone

Domino products from the reaction of 1,3-diaryl-2-propen-1-ones (chalcones) with cyclopentanone, 787

Dehydration

X-Ray, electrical, infrared and catalytic studies of the system $Zn_xCu_{1-x}Ga_2O_4$, 115

Dehydrogenation

X-Ray, electrical, infrared and catalytic studies of the system $Zn_xCu_{1-x}Ga_2O_4$, 115

Density

Density and viscosity of binary mixtures of methyl ethanoate with aromatic hydrocarbons at 298.15 K vis-a-vis molecular interactions, 133

Density and viscosity studies of binary mixtures of aniline with pentan-1-ol, hexan-1-ol, heptan-1-ol, octan-1-ol and decan-1-ol at 298.15, 303.15, 308.15 and 313.15 K, 368

Diarylbutadienes

Excited state properties of linear polyenes : fluorescence, fluorescence probe and photoisomerization studies of donor-acceptor diarylbutadienes, 53

Diarylpropenones

Domino products from the reaction of 1,3-diaryl-2-propen-1-ones (chalcones) with cyclopentanone, 787

Dibenzocycloheptene

Photophysical properties of 5*H*-dibenzo[*a*,*d*]cycloheptane in solution, 234

Dihydrazone

A bimetallic dioxomolybdenum(VI) complex containing coordinated dihydrazone in staggered configuration, 377

Dihydropyrazoles

Complexes of derivatives of 4,5-dihydro-1*H*-pyrazole as potential pesticides, 119

Dihydroxypyridine

Mixed ligand complexes of iron-, cobalt- and nickel(II) with 2,3-dihydroxypyridine and some nitrogen donors, 26

Dimethylglyoxime

Kinetics and mechamism of substitution studies on *cis*-diaqua-bis(bipyridyl)ruthenium(II) by dimethylglyoxime in 10% (v/v) ethanol, 451

Dimethylsulfoxide

Kinetics and mechanism of oxidation of dimethylsulfoxide by *N*-halosulfonamides in water-methanol and water-acetic acid media, 403

Diphenylbutadiene

A fluorescence study of 1-*p*-aminophenyl-4-phenylbuta-1*E*,3*E*-diene in organic solvents, 1,4-dioxane-water binary mixtures and micelles, 635

Diphenylcarbazone

Extraction-spectrophotometric determination of cadmium in micro quantities with diphenylcarbazone, 323

Discodermolide

Studies directed toward the synthesis of the C_{15}-C_{21} fragment of (–)-discodermolide, 543

Diselenides

Ytterbium metal promoted reaction of diselenides with allyl bromide, 313

Dithiocarbamates

A new spot test for the semi-quantification of dithiocarbamates residues in traces in soil samples of potato growing field, 422

$^6A_{1g} \rightleftharpoons {}^2T_{2g}$ spin-crossover in iron(III) dithiocarbamates, 525

Dithiophosphates

Reactivity of phenylmercury *O,O'*-alkylenedithiophosphates, 362

Dithizone

Construction of metal template polymer with covalently bound dithizone, 663

DNA

Kinetics of adsorption of DNA at solid-liquid interfaces, 689

DNA probe

Polypyridyl ruthenium complexes binding with nucleic acids, 499

Dosimetry

H1 histone as a potential *in vitro* biological dosimeter, 424

Dyes

Host-guest complexes : spectroscopic and thermodynamic studies of cyclodextrins-dyes, 533

Echinulin

Echinulin, a novel cyclic dipeptide carrying a triprenylated indole moiety from an Anacardiaceae, a Cucurbitaceae and two Orchidaceae plants : detailed high resolution 2D-NMR and mass spectral studies, 773

Elastomer

Study of interactions between a novel elastomer and solvents, 757

Electrical conductivity

Structural and electrical conductivity behavior of cationic exchanged Y-zeolites, 364

Electrodeposition

Non-equilibrium growth patterns and kinetic studies during electrodeposition of metals from $CuSO_4$-$ZnSO_4$ solutions, 460

Electron transfer reactions

Electron transfer reactions involving organic molecules, 159

Electrotopological state atom index

QSAR with electrotopological state atom index. Part-3. Receptor binding affinity of estrogens and non-steroidal estrogen analogs, 92

Enoxacin

Electroanalytical characteristics of Zn-enoxacin complex, 305

Errata 498

Estrogen analogs

QSAR with electrotopological state atom index. Part-3. Receptor binding affinity of estrogens and non-steroidal estrogen analogs, 92

Ethidium bromide

Adsorption of cationic dyes ethidium bromide and methylene blue individually as well as from their binary mixture on silica, 611

Ethyl bromoacetate

Kinetics and determination of ethyl chloroacetate and ethyl bromoacetate with piperidine, 333

Ethyl chloroacetate

Kinetics and determination of ethyl chloroacetate and ethyl bromoacetate with piperidine, 333

Ethyleneglycol

Thermodynamic study of formamide + ethyleneglycol, + diethyleneglycol, + triethyleneglycol, + poly-(ethyleneglycol) -200, + poly(ethyleneglycol)-300, + propyleneglycol and + poly(propyleneglycol)-1025 binary liquid mixtures at 35°, 259

Excess molar volume

Density and viscosity studies of binary mixtures of aniline with pentan-1-ol, hexan-1-ol, heptan-1-ol, octan-1-ol, and decan-1-ol at 298.15, 303.15, 308.15 and 313.15 K, 368

Fluorinated diketones

Chemistry of fluorinated 1,3-diketones and related compounds, 653

Ferrocene

Ferrocene-derived ligands and their reactions with titanium, organotitanium, zirconium and organozirconium compounds, 73

Fluorescence

Photophysical properties of 5*H*-dibenzo[*a,d*]cycloheptane in solution, 234

Electronic spectra and excited state properties of triptycene in solution, 298

A fluorescence study of 1-*p*-aminophenyl-4-phenylbuta-1*E*,3*E*-diene in organic solvents, 1,4-dioxane-water binary mixtures and micelles, 635

Spectroscopy of molecules seeded in cold jet : study of conformers, 649

Fluorescence probe

Excited state properties of linear polyenes : fluorescence, fluorescence probe and photoisomerization studies of donor-acceptor diarylbutadienes, 53

Fly ash

Utilisation of fly ash in insulating castable refractory, 269

Formaldehyde

A kinetic study of reaction of 2-secbutylphenol with formaldehyde using different alkali catalysts, 82

Study on preparation of asphalt antistrip additives from amines and aldehydes, 427

Formamide

Thermodynamic study of formamide + ethylene glycol, + diethyleneglycol, + triethyleneglycol, + poly-(ethyleneglycol) -200, + poly(ethyleneglycol)-300, + propyleneglycol and + poly(propyleneglycol)-1025 binary liquid mixtures at 35°, 259

Gadolinium picrate

Three-dimensional hydrogen-bonded supramolecular networks assembled by lanthanide picrates and 4,4′-bipyridine, 438

Glucopyranosides

Relative reactivities of glucopyranosides towards permanganate and chromic acid in perchloric acid medium, 287

Glycine

Polarographic studies on simple and mixed ligand systems involving cephalosporins, 455

Glyoxilidenebisaminoethylpyridine

Template synthesis of chromium(III), cobalt(II), nickel(II), copper(II) and cadmium(II) complexes with a tetradentate Schiff base, glyoxilidene-bis-2-aminoethylpyridine, 448

Guaianolides

Highly oxygenated guaianolides from some compositae plants, 779

Heterometal alkoxides

Ecstasy of learning, teaching and research experience in a university environment, 697

Hexahydropyrene

Spectroscopy of molecules seeded in cold jet : study of conformers, 649

Hexenediols

Metal chelates of 6-aryl-5-hexene-2,4-diones, 472

Hexoses

Kinetics and mechanism of oxidation of hexoses by bromamine-T in alkaline medium, 241

Histone

H1 histone as a potential *in vitro* biological dosimeter, 424

Host-guest complexes

Host-guest complexes : spectroscopic and thermodynamic studies of cyclodextrins-dyes, 533

Hydrazine

Oxidation of hydrazine and hydroxylamine by vanadium(V) under the conditions where VO_2^+ and decavanadates coexist, 237

Hydrogen atom addition

Hydrogen atom addition to d^8 complexes of nickel, palladium and platinum, 513

Hydrogenation

Kinetics of hydrogenation of some terminal olefins catalysed by anchored montmorillonitebipyridine-palladium(II) acetate, 464

Hydrolysis

Kinetics and mechanism of the hydrolysis of hydroxamate siderophore, 185

Hydroxamate siderophore

Kinetics and mechanism of the hydrolysis of hydroxamate siderophore, 185

Hydroxycoumarin

Chemistry of 4-hydroxycoumarin, 579

Reactions of 4-hydroxycoumarin with some α,β-unsaturated carbonyls and 1,3-dicarbonyls : trapping of 4-hydroxycoumarin tautomers; formation of pimelic acid derivative and a novel bicyclo compound, 765

Hydroxypyridine

Synthesis of some salts of 2,3-dihydroxypyridine and 2-amino-3-hydroxypyridine chelates of bis(cyclopentadienyl)titanium(IV), 202

Hydroxylamine

Oxidation of hydrazine and hydroxylamine by vanadium(V) under the conditions where VO_2^+ and decavanadates coexist, 237

Imidazolate

Synthesis, magnetic and spectral properties of binuclear imidazolate bridged copper(II)-copper(II) and copper(II)-zinc(II) complexes, 6

Imines

Stereocontrolled synthesis of β-lactams via Staudinger reaction between phenoxyketenes and chiral imines, 137

Immobilization

Study on selective sorption of ^{137}Cs on Al-substituted calcium silicate hydroxy hydrate, 392

Indicators

Isolation of the natural dye from the heartwood of *Caesalpinia sappan* and its use as a new neutralization indicator, 476

Indium

Extraction chromatographic method of indium(III) with *n*-capric acid, 208

Kinetics and mechanism of iridium(III) catalysed oxidation of tellurium(IV) by cerium(IV) in sulfuric acid medium, 327

Interaction energy

Studies in the changes in interaction energies of salicylic acid and salicylate ion from solubility and dissociation constant measurements of salicylic acid in isopropanol + water and *t*-butanol + water mixtures at 298 K, 729

Iodine

Investigation on iodine partition coefficient in quaternary liquid at 301.15 K, 397

Iodobenzenediazoaminoazobenzene

Investigation of property of silver complex with *p*-iodobenzenediazoaminoazobenzene by spectral correction technique, 9

Ion association

Conductance and ion association studies of diammine-bis-1-amidino-*o*-methylureacobalt(III) monochloride in methanol + water mixtures at different temperatures, 294

Ion exchange

Electron exchange studies on stannic molybdate, 13

Synthesis and ion-exchange behavior of acrylonitrile-based zirconium phosphate – A new hybrid cation exchanger, 250

Bismuth tungstate inorganic ion exchanger – an absorbent for thin layer chromatography of organic acids, 374

Ion selective electrode

Nickel(II)-ion selective electrode and its application in the determination of stability constant of metal complexes, 142

Iron

Mixed ligand complexes of iron-, cobalt- and nickel(II) with 2,3-dihydroxypyridine and some nitrogen donors, 26

Synthesis of aryl substituted azomethine complexes of iron-, cobalt- and copper(II), 28

Kinetics and mechanism of oxidation of iron(II) by *N*-chloro-*p*-substituted-benzenesulfonamides, 412

$^6A_{1g} \rightleftharpoons {}^2T_{2g}$ spin-crossover in iron(III) dithiocarbamates, 525

Isoindolinones

Isoindolinones (Phthalimidines), 671

Juvenoid ethers

Juvenile hormone analogues active on mosquitoes : Synthesis and juvenile hormonal activity of newly synthesized juvenoid ethers with α-pinene and substituted cyclohexane ring in the terminal position, 197

Ketones

Solid state regeneration of ketones from phenylhydrazones using wet silica supported sodium bismuthate under microwave irradiation, 721

Kinetics

Kinetics and mechanism of oxidation of DL-methionine by thallium(III) in perchloric acid medium, 44

A kinetic study of reaction of 2-sec-butylphenol with formaldehyde using different alkali catalysts, 82

Phosphate adsorption-desorption kinetics in some acidic soils, 86

Kinetics and mechanism of the reaction of aquachromium(III) with pyridine-3-carboxylic and pyridine-2,6-dicarboxylic acid : a comparative study, 123

Kinetics and mechanism of the hydrolysis of hydroxamate siderophore, 185

Determination of kinetic parameters from DTA curves, 189

Oxidation of hydrazine and hydroxylamine by vanadium(V) under the conditions where VO_2^+ and decavanadates coexist, 237

Kinetics and mechanism of oxidation of hexoses by bromamine-T in alkaline medium, 241

Reactivity of sulfite towards tris(pyridine-2-carboxylato)-manganese(III) in picolinate-picolinic acid buffer, 284

Relative reactivities of glucopyranosides towards permanganate and chromic acid in perchloric acid medium, 287

Kinetics of bromination of substituted acetophenones by phenyltrimethylammonium bromide, 310

Kinetics and mechanism of iridium(III) catalysed oxidation of tellurium(IV) by cerium(IV) in sulfuric acid medium, 327

Kinetics and determination of ethyl chloroacetate and ethyl bromoacetate with piperidine, 333

Kinetics and mechanism of CO_2 methanation on a nickel catalyst, 343

Kinetics and mechanism of reverse water-gas shift reaction on a Cu-ZnO-Al_2O_3 catalyst, 352

Kinetics and mechanism of oxidation of dimethylsulfoxide by *N*-halosulfonamides in water-methanol and water-acetic acid media, 403

Kinetics and mechanism of oxidation of thiosemicarbazide by substituted-*N*-chlorobenzamides in aqueous methanol medium, 407

Kinetics and mechanism of oxidation of iron(II) by *N*-chloro-*p*-substituted-benzenesulfonamides, 412

Kinetics of hydrogenation of some terminal olefins catalysed by anchored montmorillonitebipyridine-palladium(II) acetate, 464

Kinetics and mechanism of substitution studies on *cis*-diaqua-bis(bipyridyl)ruthenium(II) by dimethylglyoxime in 10% (v/v) ethanol, 451

Kinetics of adsorption of DNA at solid-liquid interfaces, 689

β-Lactam

Stereocontrolled synthesis of β-lactams via Staudinger reaction between phenoxyketenes and chiral imines, 137

Lanthanides

Synthesis of some lanthanide(III) complexes derived from 4-[*N*-(4-methoxybenzylidene)amino]antipyrinethiosemicarbazone, 39

Complex formation of rare earths with some bidentate Schiff bases : a thermodynamic study, 41

Letter to the Editor 325

Liatrinae

Chemistry of the Liatrinae, 723

Liquid crystals

Synthesis of polyesters with azomethine groups in the polymer backbone, 23

Biomolecular structural studies using NMR : re-emergence of an old idea, 112

Lisinopril

Spectrophotometric determination of lisinopril in pharmaceutical formulations, 485

Macrocycles

Synthetic macrocycles – highly selective extraction for copper(II) ions, 152

Manganese

Analysis of trace metals in psilomelane manganese ore, 482

Marine brown algae

Bioactive polysaccharides from marine brown algae (phaeophyceae), 431

Membrane

Facilitated transport of copper(II) across chloroform liquid membrane using different carriers, 495

Mercury

Synthesis and antimicrobial properties of zinc-, cadmium- and mercury(II) complexes of sulfur donor ligands, 32

Reactivity of phenylmercury *O,O'*-alkylenedithiophosphates, 362

Methanation

Kinetics and mechanism of CO_2 methanation on a nickel catalyst, 343

Methionine

Kinetics and mechanism of oxidation of DL-methionine by thallium(III) in perchloric acid medium, 44

Methylene blue

Adsorption of cationic dyes ethidium bromide and methylene blue individually as well as from their binary mixture on silica, 611

Methylazothiazolylhydroxycoumarin

Synthesis, X-ray diffraction study and biological activity of 8-(4-methyl-2-azothiazolyl)-7-hydroxy-4-methylcoumarin, 417

Methyl ethanoate

Density and viscosity of binary mixtures of methyl ethanoate with aromatic hydrocarbons at 298.15 K vis-a-vis molecular interactions, 133

Microemulsion

Radiation chemistry in microemulsion, 573

Microwave

Solid state regeneration of ketones from phenylhydrazones using wet silica supported sodium bismuthate under microwave irradiation, 721

Molar volume

Volumetric properties of some *n*-alkoxy ethanols with alkyl acetates at the temperature 298.15 K, 18

Molecular orientation

Biomolecular structural studies using NMR : re-emergence of an old idea, 112

Molecular polarizability

Calculation of molecular polarizability and water solubility of alkanes and alcohols, 192

Molecular sieve

Separation of oxygen and nitrogen from air by molecular sieve adsorbents, 551

Molybdenum

A bimetallic dioxomolybdenum(VI) complex containing coordinated dihydrazone in staggered configuration, 377

Montmorillonite

Polymerization of acrylamide in the layered space of montmorillonite, 468

Nickel

Mixed ligand complexes of iron-, cobalt- and nickel(II) with 2,3-dihydroxypyridine and some nitrogen donors, 26

Nickel(II)-ion selective electrode and its application in the determination of stability constant of metal complexes, 142

Stereochemical versatility of nickel(II) complexes with oximinoacetone-thiosemicarbazone, 230

Bioinorganic studies on nickel(II)-zidovudine complex, 257

Hydrogen atom addition to d^8 complexes of nickel, palladium and platinum, 513

Nitriles

Samarium diiodide promoted reductive cyclization of nitrodisulfides with nitriles : a new route to benzothiazoles, 316

Nitrodisulfides

Samarium diiodide promoted reductive cyclization of nitrodisulfides with nitriles : A new route to benzothiazoles, 316

Nitrogen

Separation of oxygen and nitrogen from air by molecular sieve adsorbents, 551

Nitrophenylhydrazine

A simple and sensitive spectrophotometric determination of vanadium(V) in various environmental samples, 479

NMR spectra

Understanding chemistry of spermatozoa using NMR, 103

Biomolecular structural studies using NMR : Re-emergence of an old idea, 112

^{1}H and ^{13}C spectral studies of α,β-unsaturated sulfones, 383

Correlation of substituent effects on carbon-13 NMR chemical shifts of side-chain carbons in 5-aryl-2*E*, 4*E*-pentadienoic acid derivatives by Taft DSP equation, 739

Olefins

Kinetics of hydrogenation of some terminal olefins catalysed by anchored montmorillonitebipyridine-palladium(II) acetate, 464

Organic acids

Bismuth tungstate inorganic ion exchanger – an absorbent for thin layer chromatography of organic acids, 374

Organic synthesis

Future directions in organic synthesis, 211

Organoantimony

Some chemistry of organoarsenic and antimony compounds, 224

Organoarsenic

Some chemistry of organoarsenic and antimony compounds, 224

Ornithine

Speciation of L-ornithine complexes of cobalt-, copper- and zinc(II) in water-dimethylformamide mixtures, 280

Oxidation

Kinetics and mechanism of oxidation of DL-methionine by thallium(III) in perchloric acid medium, 44

The chemistry of singlet molecular oxygen, 175

Oxidation of hydrazine and hydroxylamine by vanadium(V) under the conditions where VO_2^+ and decavanadates coexist, 237

Kinetics and mechanism of oxidation of hexoses by bromamine-T in alkaline medium, 241

Reactivity of sulfite towards tris(pyridine-2-carboxylato)manganese(III) in picolinate-picolinic acid buffer, 284

Relative reactivities of glucopyranosides towards permanganate and chromic acid in perchloric acid medium, 287

Kinetics and mechanism of iridium(III) catalysed oxidation of tellurium(IV) by cerium(IV) in sulfuric acid medium, 327

Kinetics and mechanism of oxidation of dimethylsulfoxide by *N*-halosulfonamides in water-methanol and water-acetic acid media, 403

Kinetics and mechanism of oxidation of thiosemicarbazide by substituted-*N*-chlorobenzamides in aqueous methanol medium, 407

Kinetics and mechanism of oxidation of iron(II) by *N*-chloro-*p*-substituted-benzenesulfonamides, 412

Oxidative rearrangement

Oxidative rearrangement of acetylporphyrins, 761

Oxime-hydrazones

Spectrophotometric determination of cadmium(II) using novel oxime-hydrazones in biological materials, 340

Oxothiazolidines

Synthesis of 2-aryl-3-(N^9-carbazolylacetamidyl)-4-oxothiazolidines and their 5-arylidenes as antifungal and analgesic agents, 320

Oxygen

Separation of oxygen and nitrogen from air by molecular sieve adsorbents, 551

Palladium

Synthesis of square-planar palladium(II) and platinum(II) complexes with *N*-alkylphenothiazines, 37

Transition metal complexes of tetraazamacrocycles : synthetic and spectral aspects, 98

Hydrogen atom addition to d^8 complexes of nickel, palladium and platinum, 513

Partition coefficient

Investigation on iodine partition coefficient in quaternary liquid at 301.15 K, 397

Passive film

The stability and breakdown of passive oxide films on metallic anodes, 517

Pentadienoic acid

Correlation of substituent effects on carbon-13 NMR chemical shifts of side-chain carbons in 5-aryl-2*E*, 4*E*-pentadienoic acid derivatives by Taft DSP equation, 739

Peptides

Metal complexes of some peptide derivatives. Part-XV. Mixed ligand complex formation of copper(II) with some *N*-benzenesulfonyldipeptides as primary ligands and acetate, 2-methylbenzimidazole, glycinate and bipyridine as secondary ligands, 565

Phenols

The reactions of phenols with α,β-unsaturated aromatic acids in presence of polyphosphoric acid : synthetic and mechanistic studies, 743

Phenothiazines

Synthesis of square-planar palladium(II) and platinum(II) complexes with *N*-alkylphenothiazines, 37

Phenoxyketenes

Stereocontrolled synthesis of β-lactams via Staudinger reaction between phenoxyketens and chiral imines, 137

Phenyldithiocarbamates

Reactions of diazonium salts with phenyldithiocarbamate. Part-II. Formation of related arylazophenyl-dithiocarbamates, 372

Phenylmercury

Reactivity of phenylmercury *O,O'*-alkylene-dithiophosphate, 362

Phenyltrimethylammoniumtribromide

Kinetics of bromination of substituted acetophenones by phenyltrimethylammonium tribromide, 310

Phloroglucinol

A simple and sensitive spectrophotometric determination of vanadium(V) in various environmental samples, 479

Phospholipid liposome

Photoelectrochemistry of azure dyes in phospholipid liposome, 607

Phosphorescence

Electronic spectra and excited state properties of triptycene in solution, 298

Photochemistry

Photoelectrochemistry of azure dyes in phospholipid liposome, 607

Phthalimidines

Isoindolinones (Phthalimidines), 671

Pimelic acid

Reactions of 4-hydroxycoumarin with some α,β-unsaturated carbonyls and 1,3-dicarbonyls : trapping of 4-hydroxycoumarin tautomers; formation of pimelic acid derivative and a novel bicyclo compound, 765

Piperidine

Kinetics and determination of ethyl chloroacetate and ethyl bromoacetate with piperidine, 333

Pitting potential

The stability and breakdown of passive oxide films on metallic anodes, 517

Platinum

Synthesis of square-planar palladium(II) and platinum(II) complexes with *N*-alkylphenothiazines, 37

Transition metal complexes of tetraazamacrocycles : synthetic spectral aspects, 98

Hydrogen atom addition to d^8 complexes of nickel, palladium and platinum, 513

Polarography

Voltammetric reduction behavior of *N*-(benzylidene)-2-aminopyridine, 290

Polarographic studies on simple and mixed ligand systems involving cephalosporins, 455

Analysis of trace metals in psilomelane manganese ore, 482

Polyenes

Excited state properties of linear polyenes : fluorescence, fluorescence probe and photoisomerization studies of donor-acceptor diarylbutadienes, 53

Polyesters

Synthesis of polyesters with azomethine groups in the polymer backbone, 23

Polyethyleneglycol

Thermodynamic study of formamide + ethylene glycol, + diethyleneglycol, + triethyleneglycol, + poly(ethyleneglycol)-200, + poly(ethyleneglycol)-300, + propyleneglycol and + poly(propyleneglycol)-1025 binary liquid mixtures at 35°, 259

Polymer solution

Study of interactions between a novel elastomer and solvents, 757

Polymerization

Polymerization of acrylamide in the layered space of montmorillonite, 468

Kinetic studies on the polymerization of acrylonitrile initiated by *p*-nitrophenacyl dimethyl sulfonium ylide, 547

Polyoxotungstate

Studies of some mixed valence polyoxometalate anion containing two hetero atoms, 204

Polyphosphoric acid

The reactions of phenols with α,β-unsaturated aromatic acids in presence of polyphosphoric acid : synthetic and mechanistic studies, 743

Polypyridylruthenium

Polypyridylruthenium complexes binding with nucleic acids, 499

Polysaccharides

Bioactive polysaccharides from marine brown algae (phaeophyceae), 431

Presidential address

Recent trends in chemical sciences, 51

Propargylic alcohol

Mitsunobu coupling of 7-hydroxycoumarins with allylic and propargylic alcohols : a facile direct access to tertiary allyl coumarinyl ethers, 380

Pyrazinecarboxylic acid

Study on some metal(II) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

Pyrazoles

Complexes of derivatives of 4,5-dihydro-1*H*-pyrazole as potential pesticides, 119

Pyrazolylthiosemicarbazone

Synthesis and spectroscopic identification of cobalt(III) complexes with 5-methyl-3-formylpyrazole-*N*(4)-dipropylthiosemicarbazone ($HMPzNPr_2$) : X-ray crystal structure of $[Co(MPzNPr_2)_2]NO_3.H_2O$, 601

Pyridazine

Spectroscopic and conductivity studies on pyridazine metal complexes, 146

Pyridinecarboxylic acid

Kinetics and mechanism of the reaction of aquachromium(III) with pyridine-3-carboxylic and pyridine-2, 6-dicarboxylic acid : a comparative study, 123

Study on some metal(III) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

QSAR

QSAR with electrotopological state atom index. Part-3. Receptor binding affinity of estrogens and non-steroidal estrogen analogs, 92

Quantitative structure activity relationship (QSAR) studies on anti-HIV-1 and cytotoxic arylpyrrolylsulfones, 154

Calculation of molecular polarizability and water solubility of alkanes and alcohols, 192

Quinolinylthiazolidinones

Synthesis and biological evaluation of 3-aryl-2-(2-chloro-7-methoxyquinolin-3-yl)-4-thiazolidinones, 47

Radiation

Radiation chemistry in microemulsion, 573

Radioprotection

Mechanism of radioprotection by β-aminoethyl isothiouronium bromide hydrobromide, 337

Receptor binding affinity

QSAR with electrotopological state atom index. Part-3. Receptor binding affinity of estrogens and non-steroidal estrogen analogs, 92

Reduction

Convolutive voltammetric sutdies on some *N*-benzylsulfonyl-3,5-dimethyl-4-arylazopyrazoles and some of its derivatives at a mercury cathode, 127

Reductive cleavage

$Sm/ZrCl_4$ induced reductive cleavage of Te-Te bond in diaryl ditellurides : a novel method for the synthesis of unsymmetrical tellurides, 144

Refractory

Utilisation of fly ash in insulating castable refractory, 269

Review

Excited state properties of linear polyenes : fluorescence, fluorescence probe and photoisomerization studies of donor-acceptor diarylbutadienes, 53

Understanding chemistry of spermatozoa using NMR, 103

Electron transfer reactions involving organic molecules, 159

The chemistry of singlet molecular oxygen, 175

Future directions in organic synthesis, 211

Some chemistry of organoarsenic and antimony compounds, 224

Chelation and antibiotic activity, 273

Bioactive polysaccharides from marine brown algae (phaeophyceae), 431

$^6A_{1g} \rightleftharpoons {}^2T_{2g}$ spin-crossover in iron(III) dithiocarbamates, 525

Separation of oxygen and nitrogen from air by molecular sieve adsorbents, 551

Chemistry of 4-hydroxycoumarin, 579

Sonochemistry : Past, present and future, 627

Chemistry of fluorinated 1,3-diketones and related compounds, 653

Isoindolinones (Phthalimidines), 671

Mixed ligand complexes : stabilities and reactivities, 707

Chemistry of the Liatrinae, 723

Highly oxygenated guaianolides from some compositae plants, 779

Ruthenium

Kinetics and mechanism of substitution studies on *cis*-diaqua-bis(bipyridyl)ruthenium(II) by dimethylglyoxime in 10% (v/v) ethanol, 451

Polypyridyl ruthenium complexes binding with nucleic acids, 499

Salicylate

Studies in the changes in interaction energies of salicylic acid and salicylate ion from solubility and dissociation constant measurements of salicylic acid in isopropanol + water and *t*-butanol + water mixtures at 298 K, 729

Salicylic acid

Studies in the changes in interaction energies of salicylic acid and salicylate ion from solubility and dissociation constant measurements of salicylic acid in isopropanol + water and *t*-butanol + water mixtures at 298 K, 729

Samarium

$Sm/ZrCl_4$ induced reductive cleavage of Te-Te bond in diaryl ditellurides : a novel method for the synthesis of unsymmetrical tellurides, 144

Samarium diiodide

Samarium diiodide promoted reductive cyclization of nitrodisulfides with nitriles : a new route to benzothiazoles, 316

Schiff base

A chromium(III) complex of a long-chain Schiff base ligand, 1

Synthesis and antimicrobial properties of zinc-, cadmium- and mercury(II) complexes of sulfur donor ligands, 32

Complex formation of rare earths with some bidentate Schiff bases : a thermodynamic study, 41

pH-metric and electronic spectral studies on Schiff base complex formation with some 3*d*-metal ions, 308

Synthesis of uranium(IV) complexes of Schiff bases, 360

Template synthesis of chromium(III), cobalt(II), nickel(II), copper(II) and cadmium(II) complexes with a tetradentate Schiff base, glyoxilidene-bis-2-aminoethylpyridine, 448

Seagrass

Elemental analysis of seagrass and sediment, 509

Silica

Adsorption of cationic dyes ethidium bromide and methylene blue individually as well as from their binary mixture on silica, 611

Silver

Investigation of property of silver complex with *p*-iodobenzenediazoaminoazobenzene by spectral correction technique, 9

Singlet oxygen

The chemistry of singlet molecular oxygen, 175

Sodium carbonate

Effect of sodium carbonate on some properties of magnesia cement, 389

Soils

Phosphate adsorption-desorption kinetics in some acidic soils, 86

Solid-liquid interface

Organic fluids near a hard wall : statistical mechanical approach, 15

Solubility

Calculation of molecular polarizability and water solubility of alkanes and alcohols, 192

Sonochemistry

Sonochemistry : Past, present and future, 627

Sorption

Study on selective sorption of ^{137}Cs on Al-substituted calcium silicate hydroxy hydrate, 392

Spermatozoa

Understanding chemistry of spermatozoa using NMR, 103

Spinel

X-Ray, electrical, infrared and catalytic studies of the system $Zn_xCu_{1-x}Ga_2O_4$, 115

Spot test

A new spot test for the semi-quantification of dithiocarbamates residues in traces in soil samples of potato growing field, 422

Stability constant

Nickel(II)-ion selective electrode and its application in the determination of stability constant of metal complexes, 142

Metal complexes of some peptide derivatives. Part-XV. Mixed ligand complex formation of copper(II) with some *N*-benzenesulfonyldipeptides as primary lignads and acetate, 2-methylbenzimidazole, glycinate and bipyridine as secondary ligands, 565

Stannic molybdate

Electron exchange studies on stannic molybdate, 13

Strontium

Synthesis and ion-exchange behavior of acrylonitrile-based zirconium phosphate – a new hybrid cation exchanger, 250

Substituent effect

Correlation of substituent effects on carbon-13 NMR chemical shifts of side-chain carbons in 5-aryl-2*E*,4*E*-pentadienoic acid derivatives by Taft DSP equation, 739

Sulfite

Reactivity of sulfite towards tris(pyridine-2-carboxylato)-manganese(III) in picolinate-picolinic acid buffer, 284

Sulfonamides

Kinetics and mechanism of oxidation of dimethylsulfoxide by *N*-halosulfonamides in water-methanol and water-acetic acid media, 403

Sulfones

^1H and ^{13}C spectral studies of α,β-unsaturated sulfones, 383

Surface free energy

Organic fluids near a hard wall : statistical mechanical approach, 15

Taxoids

Acid catalyzed conversions of taxoids, 667

Tellurides

$Sm/ZrCl_4$ induced reductive cleavage of Te-Te bond in diaryl ditellurides : a novel method for the synthesis of unsymmetrical tellurides, 144

Tellurium

Kinetics and mechanism of iridium(III) catalysed oxidation of tellurium(IV) by cerium(IV) in sulfuric acid medium, 327

Template polymer

Construction of metal template polymer with covalently bound dithizone, 663

Tetraazamacrocycles

Transition metal complexes of tetraazamacrocycles : synthetic and spectral aspects, 98

Tetra(dibromohydroxyphenyl)prophyrin

Property of cadmium and zinc complexes with *meso*-tetra-(3,5-dibromo-4-hydroxyphenyl)porphyrin and simultaneous determination of cadmium and zinc by spectral correction method, 246

Tetrahydroisoquinoline

Spectroscopy of molecules seeded in cold jet : study of conformers, 649

Thallic nitrate

Oxidative rearrangement of acetylporphyrins, 761

Thallium

Kinetics and mechanism of oxidation of DL-methionine by thallium(III) in perchloric acid medium, 44

Thermal analysis

Determination of kinetic parameters from DTA curves, 189

Thermodynamics

Thermodynamic study of formamide + ethylene glycol, + diethyleneglycol, + triethyleneglycol, + poly(ethyleneglycol)-200, + poly(ethyleneglycol)-300, + propyleneglycol and + poly(propyleneglycol)-1025 binary liquid mixtures at 35°, 259

Thiosemicarbazones

Stereochemical versatility of nickel(II) complexes with oximinoacetone-thiosemicarbazone, 230

Kinetics and mechanism of oxidation of thiosemicarbazide by substituted-*N*-chlorobenzamides in aqueous methanol medium, 407

Thullium picrate

Three-dimensional hydrogen-bonded supramolecular networks assembled by lanthanide picrates and 4,4′-bipyridine, 438

Thymine

Synthesis and spectroscopic characterization of cobalt(III) based supramolecular complexes bearing thymine and adenine, 643

Tin

Synthesis and reactivity of triphenyltin(IV) compounds containing Sn–S bonds, 254

Titanium

Ferrocene-derived ligands and their reactions with titanium, organotitanium, zirconium and organozirconium compounds, 73

Synthesis of some salts of 2,3-dihydroxypyridine and 2-amino-3-hydroxypyridine chelates of bis(cyclopentadienyl)titanium(IV), 202

Titanium tungstate

Retention behaviour of metal ions on plain and tri-*n*-butylamine impregnated titanium(IV) tungstate layers, 301

Tobermorite

Study on selective sorption of ^{137}Cs on Al-substituted calcium silicate hydroxy hydrate, 392

Topology

A new method for construction of duplexes of non-alternant graphs and calculation of topological bond order, 597

Transition metals

Synthetic, structural and electrical studies of some polychelates derived from bis(mercaptoacetamido)-3,3′-dimethoxybenzidene, 34

Complexes of derivatives of 4,5-dihydro-1*H*-pyrazole as potential pesticides, 119

Spectroscopic and conductivity studies on pyridazine metal complexes, 146

Synthesis of zinc-, cadmium- and mercury(II) complexes with triazole Schiff bases, 148

pH-metric and electronic spectral studies on Schiff base complex formation with some 3*d*-metal ions, 308

Polymetallic complexes. Part-LXXV. Cobalt-, nickel-, copper-, zinc-, cadmium- and mercury(II) with bis-bidentate azodye ligands, 395

Template synthesis of chromium(III), cobalt(II), nickel(II), copper(II) and cadmium(II) complexes with a tetradentate Schiff base, glyoxilidene-bis-2-aminoethylpyridine, 448

Metal chelates of 6-aryl-5-hexene-2,4-diones, 472

Construction of metal template polymer with covalently bound dithizone, 663

Transport phenomenon

Facilitated transport of copper(II) across chloroform liquid membrane using different carriers, 495

Transpassivation potential

The stability and breakdown of passive oxide films on metallic anodes, 517

Triazoles

One-pot synthesis of 1,2,3-triazoles from α-oxonitriles, 101

Synthesis of zinc-, cadmium- and mercury(II) complexes with triazole Schiff bases, 148

Tribenzobarrelene

Electronic spectra and excited state properties of triptycene in solution, 298

Tributylamine

Retention behaviour of metal ions on plain and tri-*n*-butylamine impregnated titanium(IV) tungstate layers, 301

Tricalcium phosphate

Synthesis, sintering and microstructure of beta-tricalcium phosphate for prosthetic applications, 386

Triphenyltin

Synthesis and reactivity of triphenyltin(IV) compounds containing Sn–S bonds, 254

Triplet state

Electronic spectra and excited state properties of triptycene in solution, 298

Triptycene

Electronic spectra and excited state properties of triptycene in solution, 298

Triterpene

Triterpene from *Adiantum lunulactum*, 267

Uranium

Synthesis of uranium(IV) complexes of Schiff bases, 360

Vanadium

Oxidation of hydrazine and hydroxylamine by vanadium(V) under the conditions where VO_2^+ and decavanadates coexist, 237

A simple and sensitive spectrophotometric determination of vanadium(V) in various environmental samples, 479

Viscosity

Density and viscosity of binary mixtures of methyl ethanoate with aromatic hydrocarbons at 298.15 K vis-a-vis molecular interactions, 133

Density and viscosity studies of binary mixtures of aniline with pentan-1-ol, hexan-1-ol, heptan-1-ol, octan-1-ol and decan-1-ol at 298.15, 303.15, 308.15 and 313.15 K, 368

Voltammetry

Voltammetric reduction behaviour of *N*-(benzylidene)-2-aminopyridine, 290

Electroanalytical characteristics of Zn-enoxacin complex, 305

Water-gas shift reaction

Kinetics and mechanism of reverse water-gas shift reaction on a Cu-ZnO-Al_2O_3 catalyst, 352

X-Ray crystallography

Three-dimensional hydrogen-bonded supramolecular networks assembled by lanthanide picrates and 4,4′-bipyridine, 438

Study on some metal(III) complexes with pyrazine-2-carboxylic and pyridine-2-carboxylic acids, 444

Ytterbium

A novel method for the synthesis of allylic sulfides from disulfides and allylytterbium bromide, 263

Ytterbium metal promoted reaction of diselenides with allyl bromide, 313

Zeolite

Structural and electrical conductivity behaviour of cationic exchanged Y-zeolites, 364

Zidovudine

Bioinorganic studies on nickel(II)-zidovudine complex, 257

Zinc

Synthesis, magnetic and spectral properties of binuclear imidazolate bridged copper(II)-copper(II) and copper(II)-zinc(II) complexes, 6

Synthesis and antimicrobial properties of zinc-, cadmium- and mercury(II) complexes of sulfur donor ligands, 32

Preconcentration and separation by imidazolylazo resin for copper and zinc determination in biological samples by AAS after microwave assisted treatment, 89

Property of cadmium and zinc complex with *meso*-tetra-(3,5-dibromo-4-hydroxyphenyl)porphyrin and simultaneous determination of cadmium and zinc by spectral correction method, 246

Speciation of L-ornithine complexes of cobalt-, copper- and zinc(II) in water-dimethylformamide mixtures, 280

Electroanalytical characteristics of Zn-enoxacin complex, 305

Non-equilibrium growth patterns and kinetic studies during electrodeposition of metals from $CuSO_4$-$ZnSO_4$ solutions, 460

Zirconium

Ferrocene-derived ligands and their reactions with titanium, organotitanium, ziroconium and organozirconium compounds, 73

Zirconium phosphate

Synthesis and ion-exchange behavior of acrylonitrile-based zirconium phosphate – a new hybrid cation exchanger, 250
